Tips for Best Results

Uploading a “selfie” is a part of the process in the following demos. Open the demo links on a smartphone or tablet

Customer Support: support@lapetussolutions.com, Info on tools and testing: info@lapetussolutions.com

for the best experience. In order to get the best estimates possible, please: ensure your face is well lit, remove glasses, push hair away from your face, keep camera/phone at least at arm's length, and look straight at the camera.

Note for Term Version: Please press "skip" when you get to the wearable request page, as the wearable assessment is turned off for demo purposes.

Lapetus Solutions Demo Performance

Our demos are for illustrative purposes and may not represent the latest versions of our algorithms or platforms. The selfie and longevity analysis assume a US based target audience and may exhibit differential performance on faces from other areas; and the demographic questions may not align with your country. Production versions of our platforms are highly tuned to your specific target market and product, and IT performance is optimized for your geographic region.
