

Atoti+

Build and deploy the best
enterprise analytics
applications 50 times faster

Fast - Collaborative - Agile -
Cloud-Native - Professional

Atoti+ is

Fast:

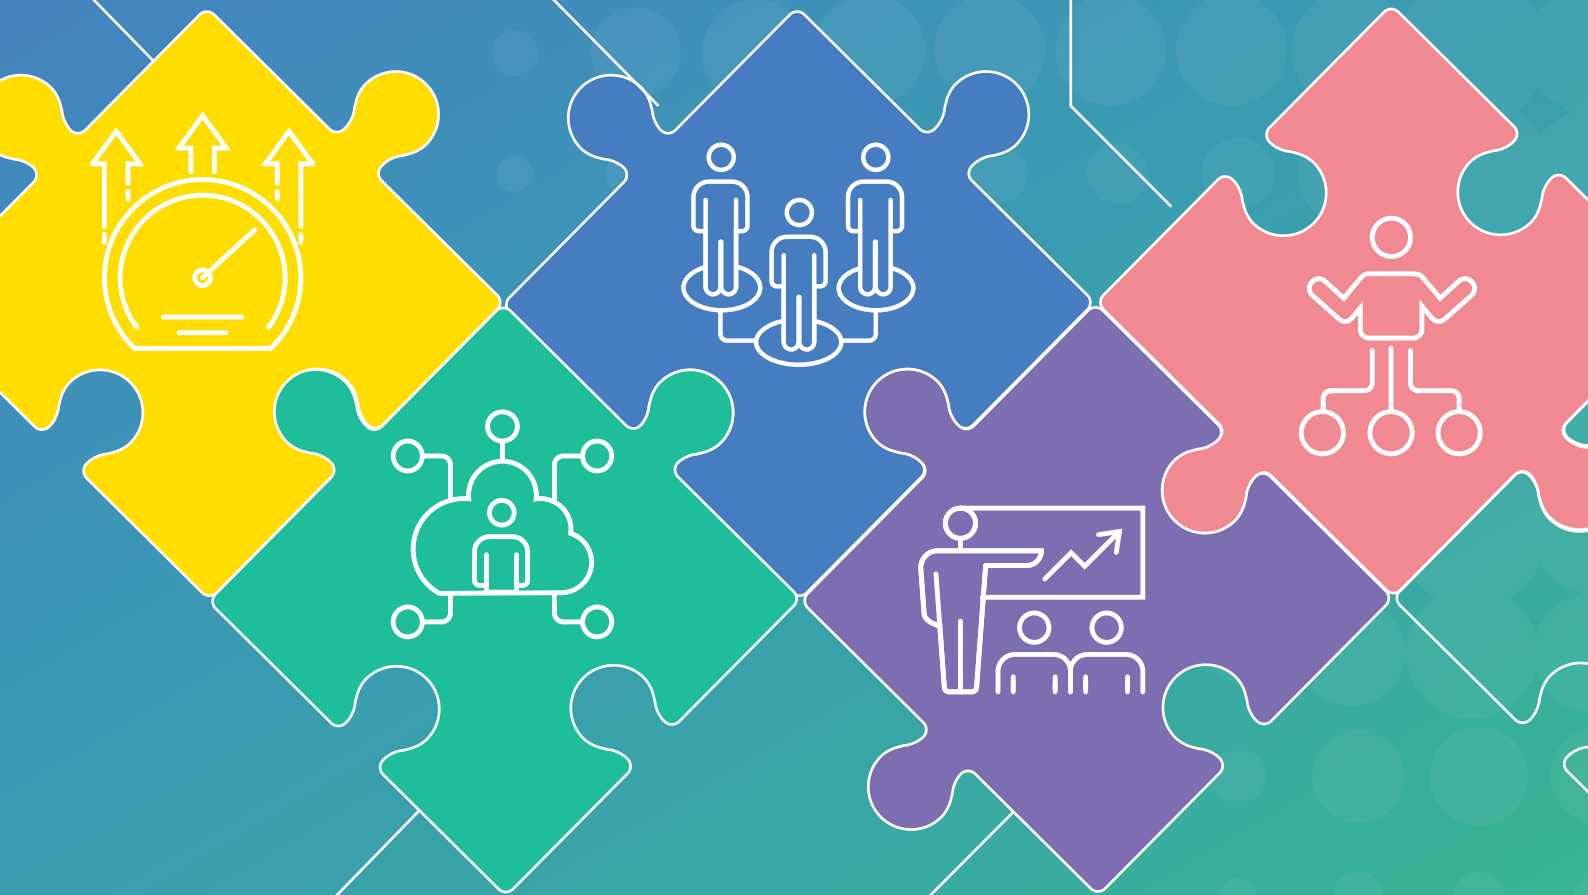

Based on the award-winning ActivePivot in-memory technology, Atoti+ resolves complex calculations over large data volumes in milliseconds where other solutions take hours.

Collaborative:

Atoti+ transforms data analysis by bringing business users together in a single environment where they can easily share data, ideas and insights.

Agile:

We offer both a Java and a Python API, so developers can turn out new analytics dashboards and applications in record time, as well as integrate ideas from quants and end-users in the design.

Cloud-native:

Atoti+ is a cloud-native product, cost-efficient and capable of scaling up and scaling out at will. Atoti+ can also be deployed on-premise or as SaaS.

Professional:

Atoti+'s technology already serves dozens of major banks today for mission-critical functions. It features everything you'd expect from financial technology for security, reliability and control.

Is your company making the best decisions it can with the most up-to-date data? Are the tools you use reflective of this?

Decisions rely on data, but too often the data is harder to get to than it should be.

Why is that?

- Different departments each have their own set of tools
- Analytics applications are often outdated, undersized and not a good fit for the usage. They don't match your current needs, but upgrading them or changing them is slow, painful and costly
- End users and developers have to compromise on what they need, what's possible, and what can be delivered in a timely fashion

Decision-makers at financial firms often have no choice but to rely on their best guess or to wait for outdated systems to supply them with better information, even after the optimal time window for a decision has passed.

This is a dicey game to play. The consequences can add up to a significant loss of performance across the board -- and sometimes, it can be downright catastrophic.

Atoti+ solves this problem.

Atoti+ empowers companies with the most up-to-date information, readily available, to make the best decisions they can in a timely manner.

What is Atoti+?

Atoti+ is the first truly unified analytics platform. Atoti+ features a unique combination of advanced technologies (in-memory computing, cloud-native architecture, multi-dimensional analysis) that delivers precise, flexible, interactive analytics even on the largest datasets without losing performance. It scales up and scales out seamlessly and ensures the most cost-efficient use of hardware.

Unlike other platforms with high-powered backends, Atoti+ enables businesses to design, build and deliver powerful big-data analytics apps quickly with interactive, user-friendly dashboards and high-quality visualizations.

What makes Atoti+ tick?

Atoti+ features comprehensive Python and Java APIs, offering the best possible combination of accessibility, speed-of-development and control.

Atoti+ offers enterprise-grade security and support in every deployment.

Atoti+ apps have a faster time-to-market than any other platform.

What does Atoti+ do best?

Atoti+ shines in any situation that involves complex aggregation over large, fast-moving datasets with many dimensions, and especially when users need to drill-down & drill-through and run 'What-If' scenarios.

Projects and implementations in production today include:

- Front-office risk management
- FRTB-compliant regulatory reporting
- Capital optimization
- Credit risk management
- Liquidity stress testing
- Real-time PnL monitoring

The result:

- ⊕ Analytics app development is agile and inclusive with Atoti+.
- ⊕ It breaks internal siloes between business units. Quants, IT and business users work in harmony on the same platform.
- ⊕ Sharing information is much easier on a unified platform, with a single point of truth.
- ⊕ Atoti+ eliminates "Shadow IT" and flying Excel spreadsheets, and puts your datalake to use at last.
- ⊕ Insights come faster and are more precise. The company is more efficient and more performant.

Atoti+ helps companies make the best decisions, with faster, more precise data analytics.

About ActiveViam

ActiveViam provides precision data analytics tools to help organizations make better decisions faster.

ActiveViam started in 2005 with the vision of leveraging in-memory technology to create an analytics platform where businesses could leverage the largest data sets without restrictions, keep them up-to-date in real time and use them to empower their decision makers.

Our goal at ActiveViam, is to let organizations not only make decisions faster, but better; to not only reach their data, but their potential; to not only see their data, but find their way into the future.

ActiveViam is a privately owned company with offices in London, New York, Paris, Singapore and Hong Kong.
