RISK SOLUTIONS

# Comprehensive Risk Management

Total connectivity and visibility into your workplace's health, safety, and sustainability data
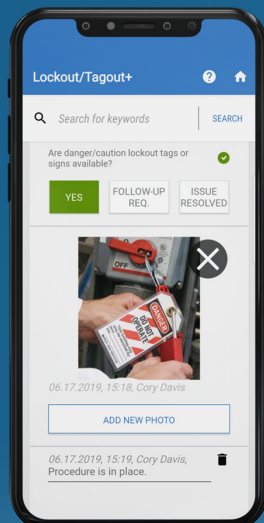

Mobile Devices makes it easy to perform observations, assign issues, capture safety talks and access critical files from wherever people work
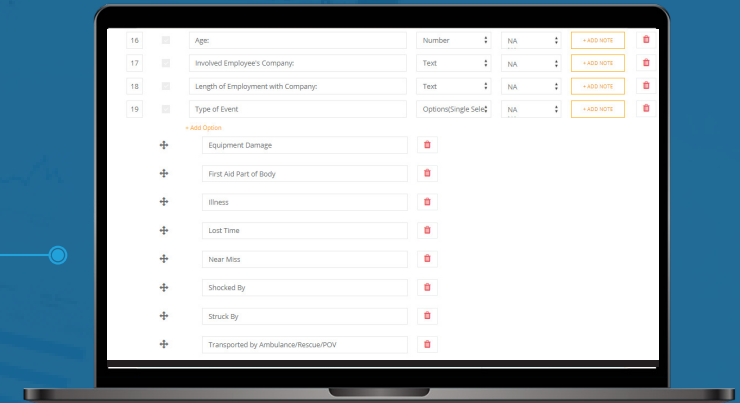

Website provides a way to access a library of best practices, digitize forms and generate QR codes
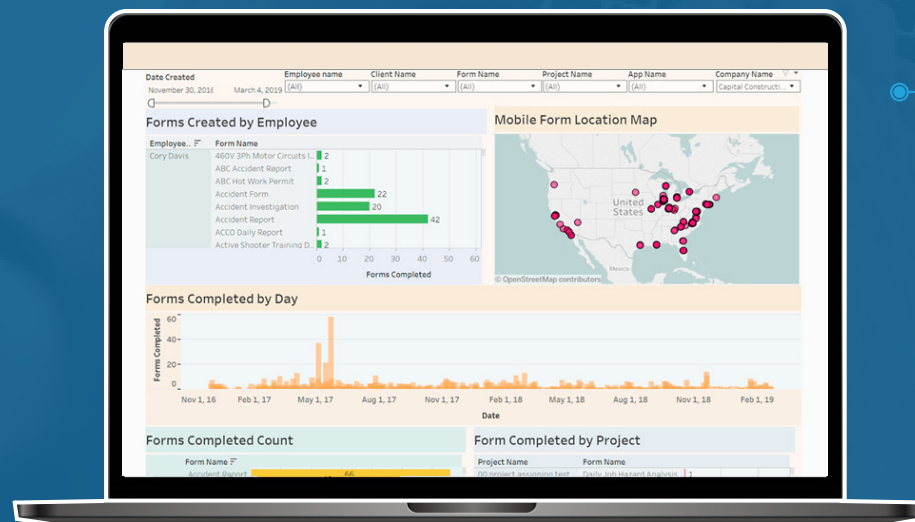

Unprecedented analytic reporting provides insights in real time to all levels of the organization

Daily Report Dashboard

Track all third party contractors as well as internal daily reporting.

Incident and Accident Reporting

Report using polygon mapping.

Lessons Learned

Become a learning organization by leveraging the knowledge from your employees

Incentive Programs

Employee engagement
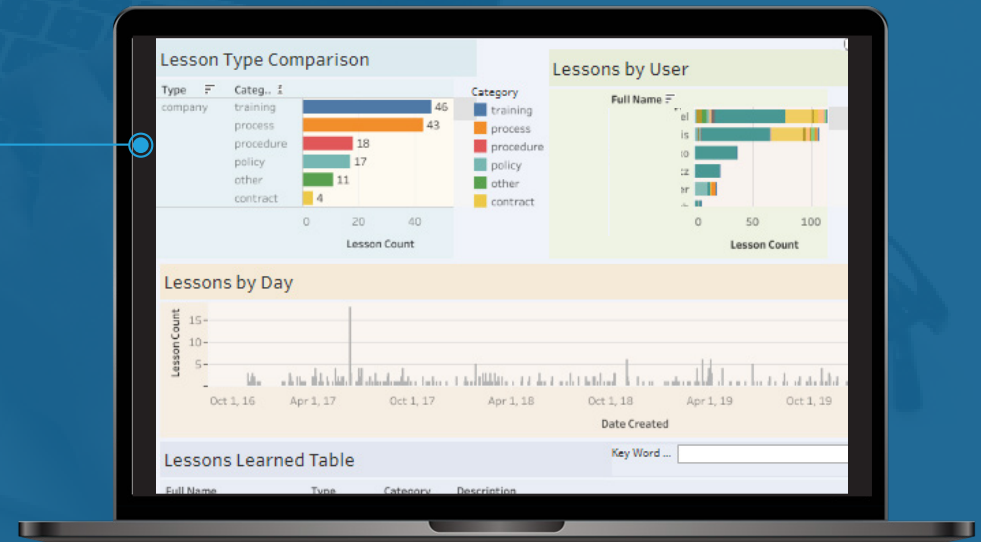

Programmatic Reporting

Customized dashboards for your organization
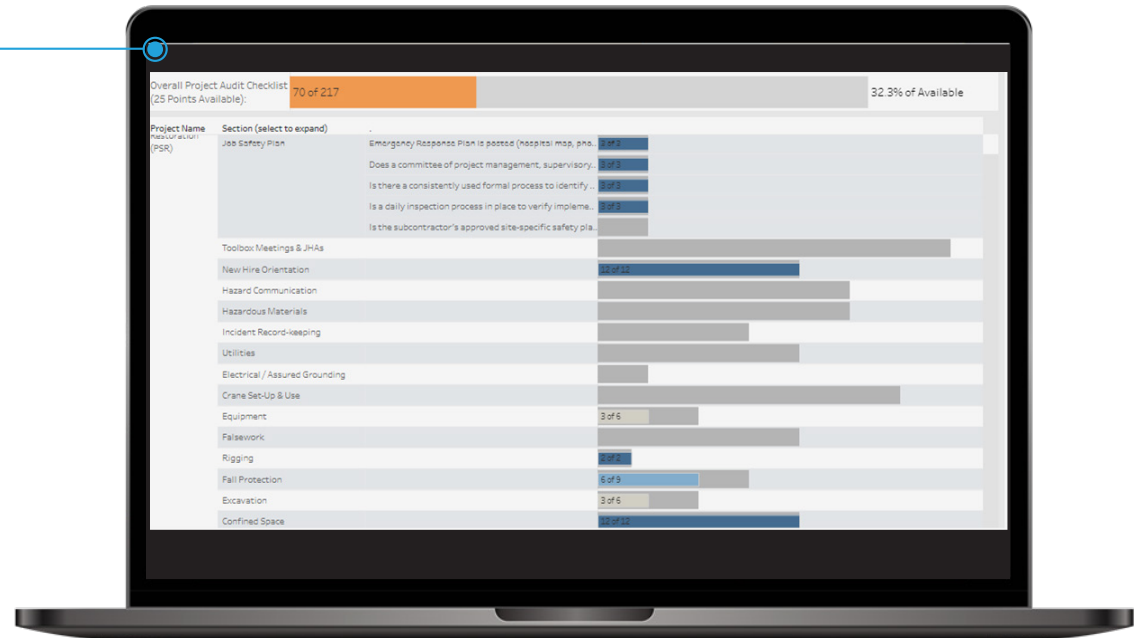

Report across divisions, projects and companies
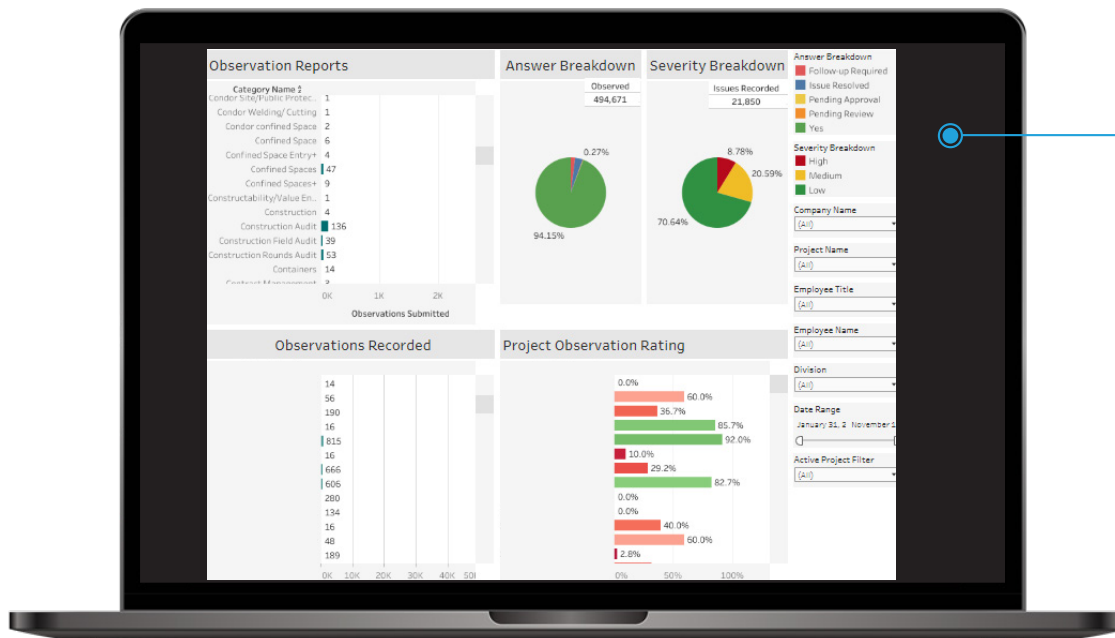

Employee Health

Monitor the health of your employees in real time

Quick checks provide a high-level overview of compliance

Certificate of Insurance

Track expiration dates
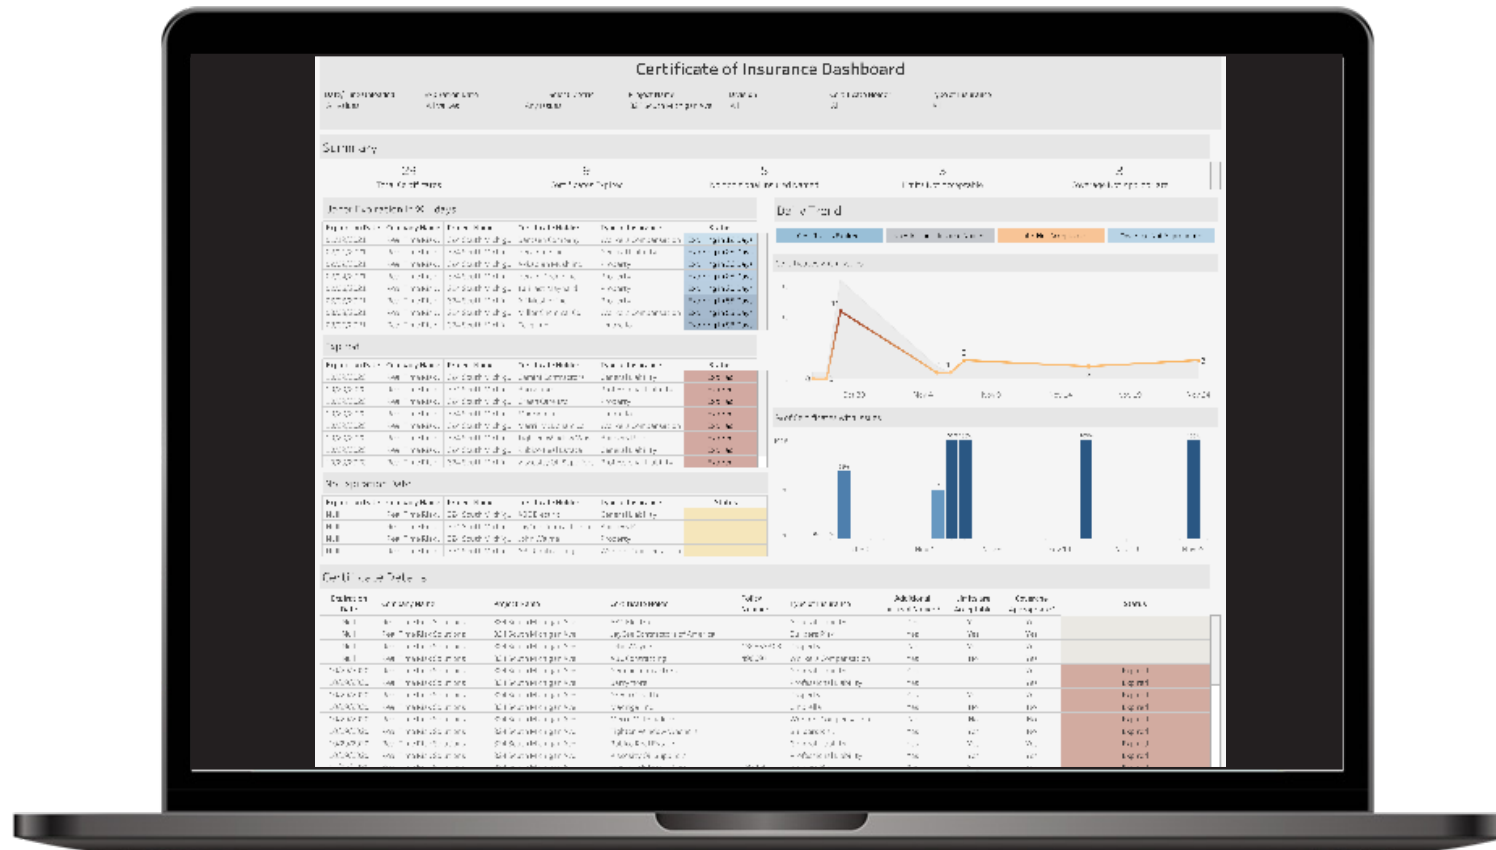

Risk Registers

Track and monitor project and program risk by all stakeholders

Pulldowns to help filter the data set

KPI's on workplace monitors
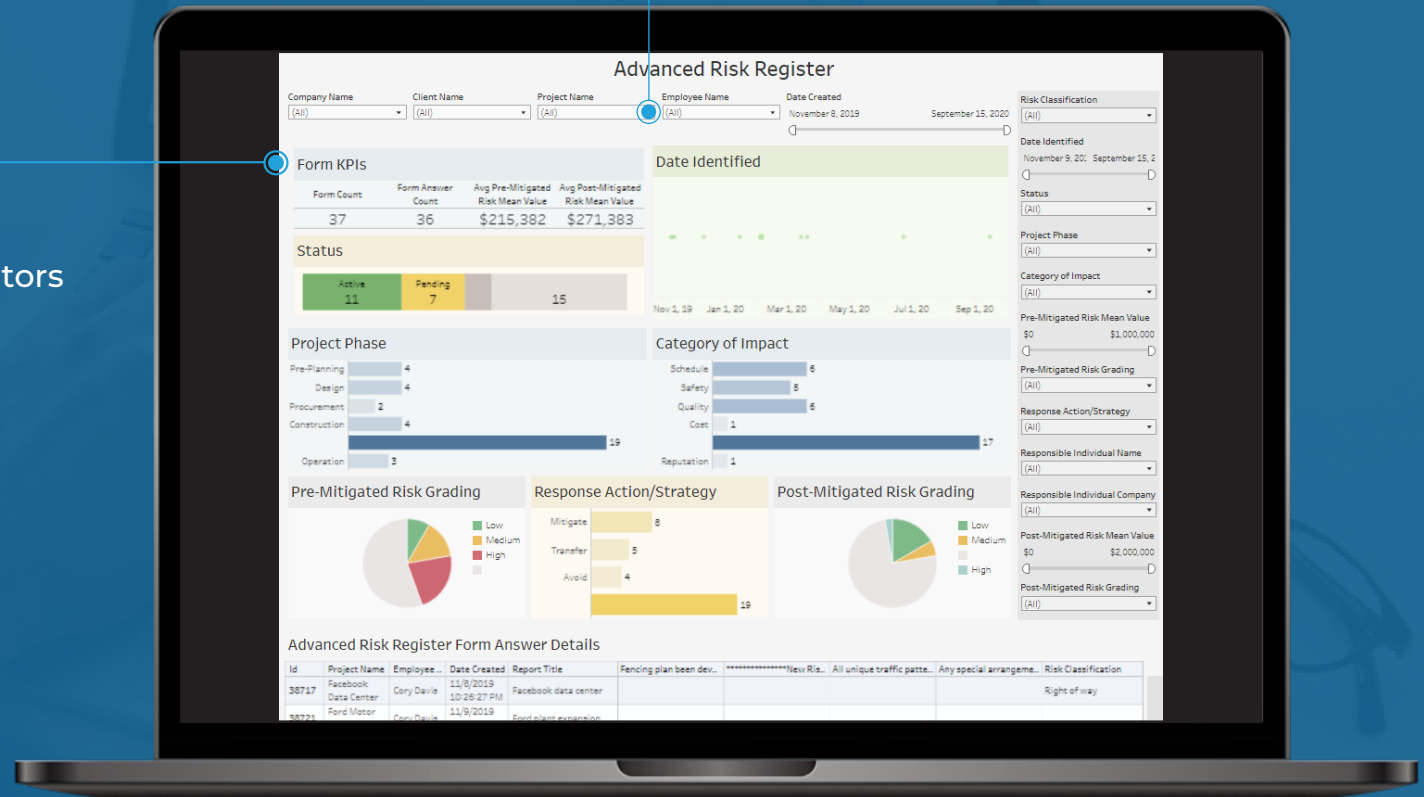

Specific Analytics by Region, Division, Project

Custom views for everyone within the organization

Receive email notifications
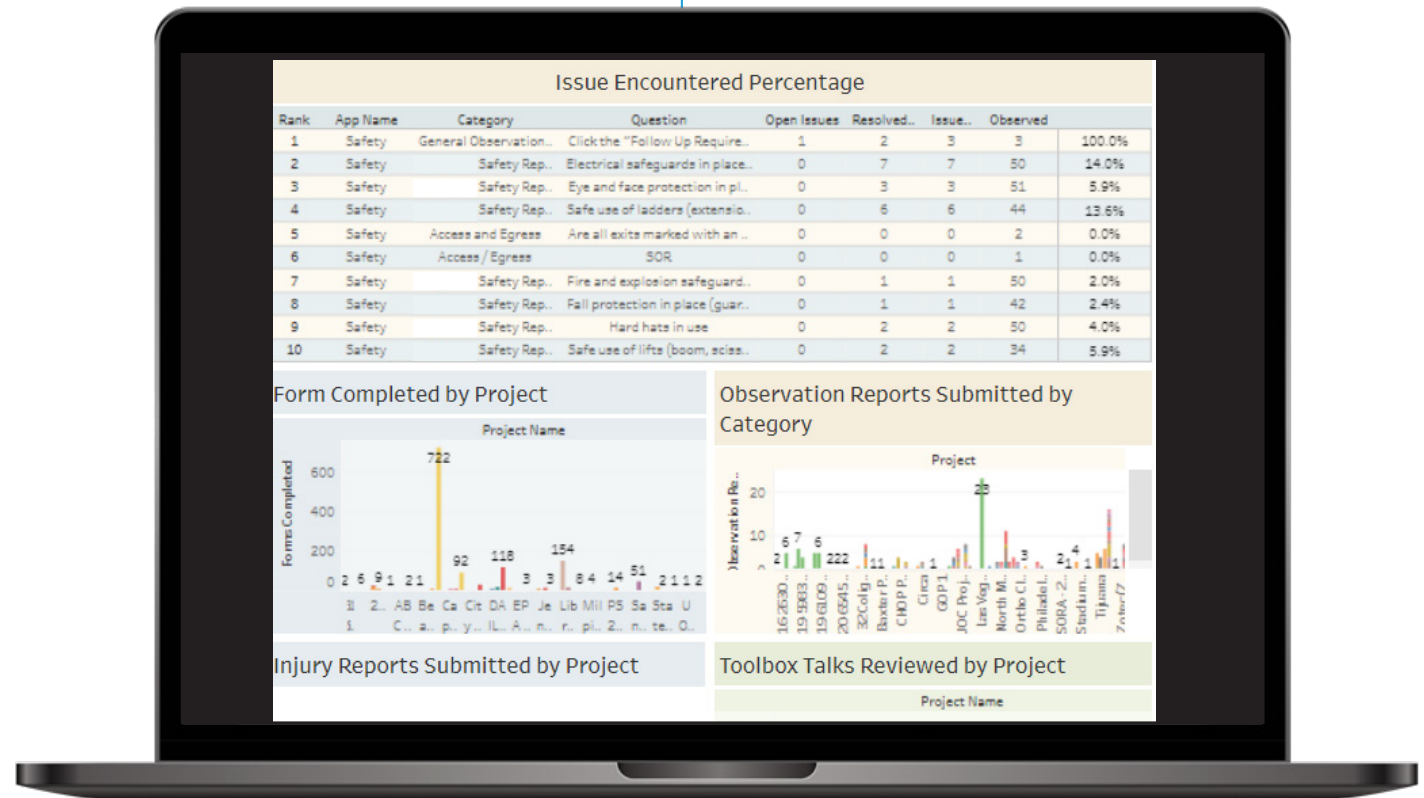

Track Goals in Real-Time

Personalize with your brand

Goals

Toolbox Talks by Project

Observation Reports Submitted by Project

Total Leadership Audits Completed by Project
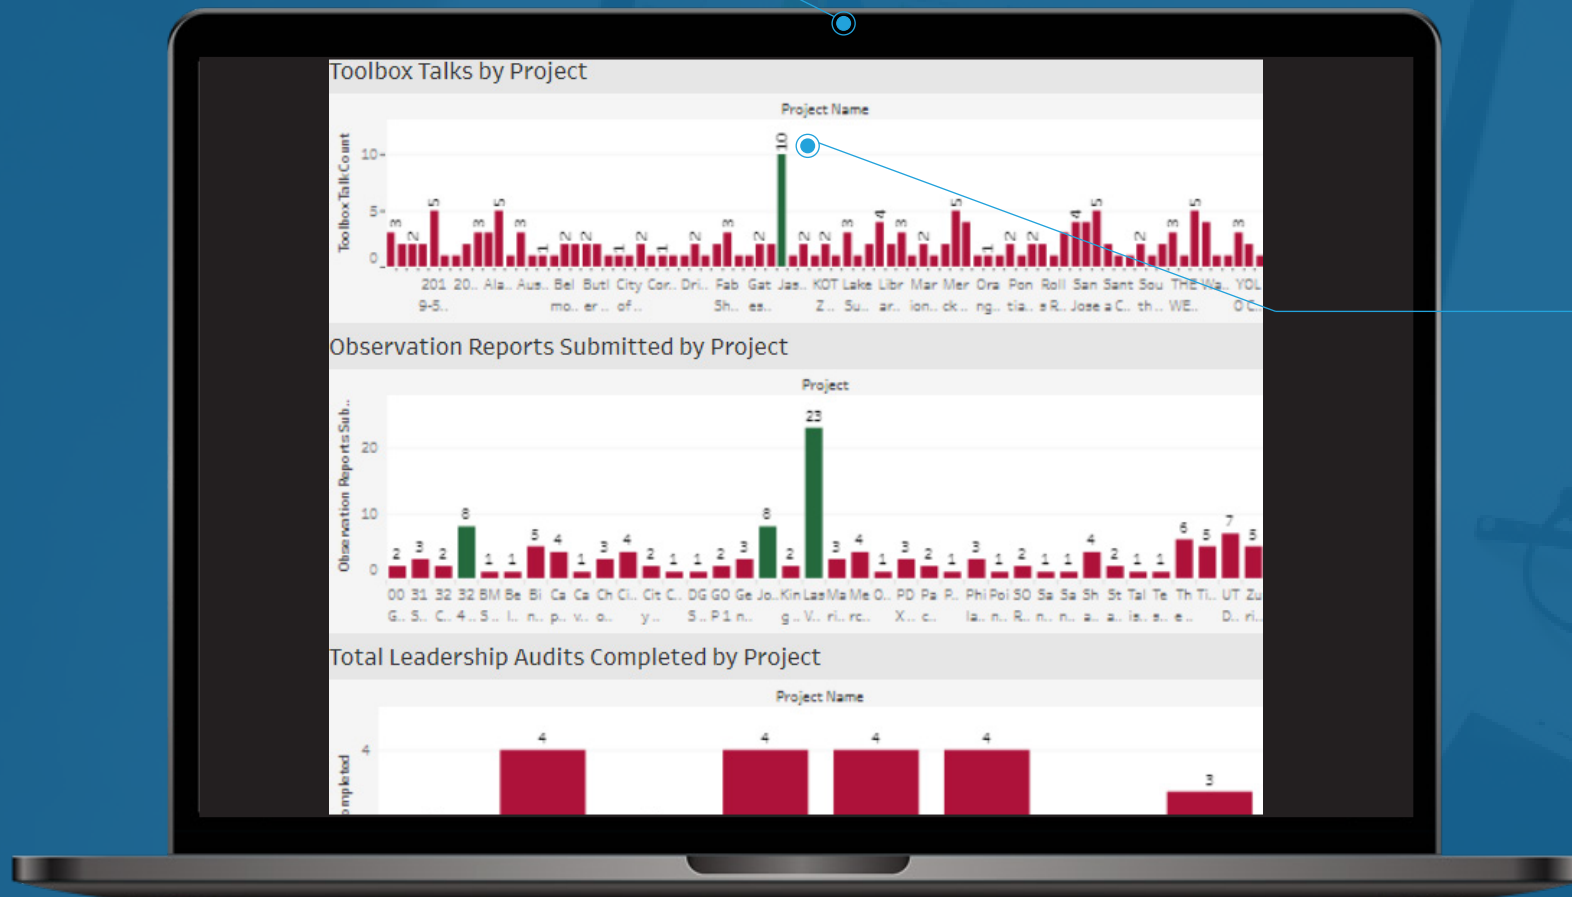

Trend Leading Indicators

Measure leading indicators and determine what policies and training are required to reduce the risk throughout the organization

Capture GPS points at place of impact

Connect Leading and Lagging Indicators

Calculate scores from data sets

Predictive Modeling

Develop algorithms to track critical risk measures throughout the organization

Behavioral Based Safety

Word Clouds

Use different business intelligence tools to showcase data in presentations and reporting

Size of the objects help you focus on the important things
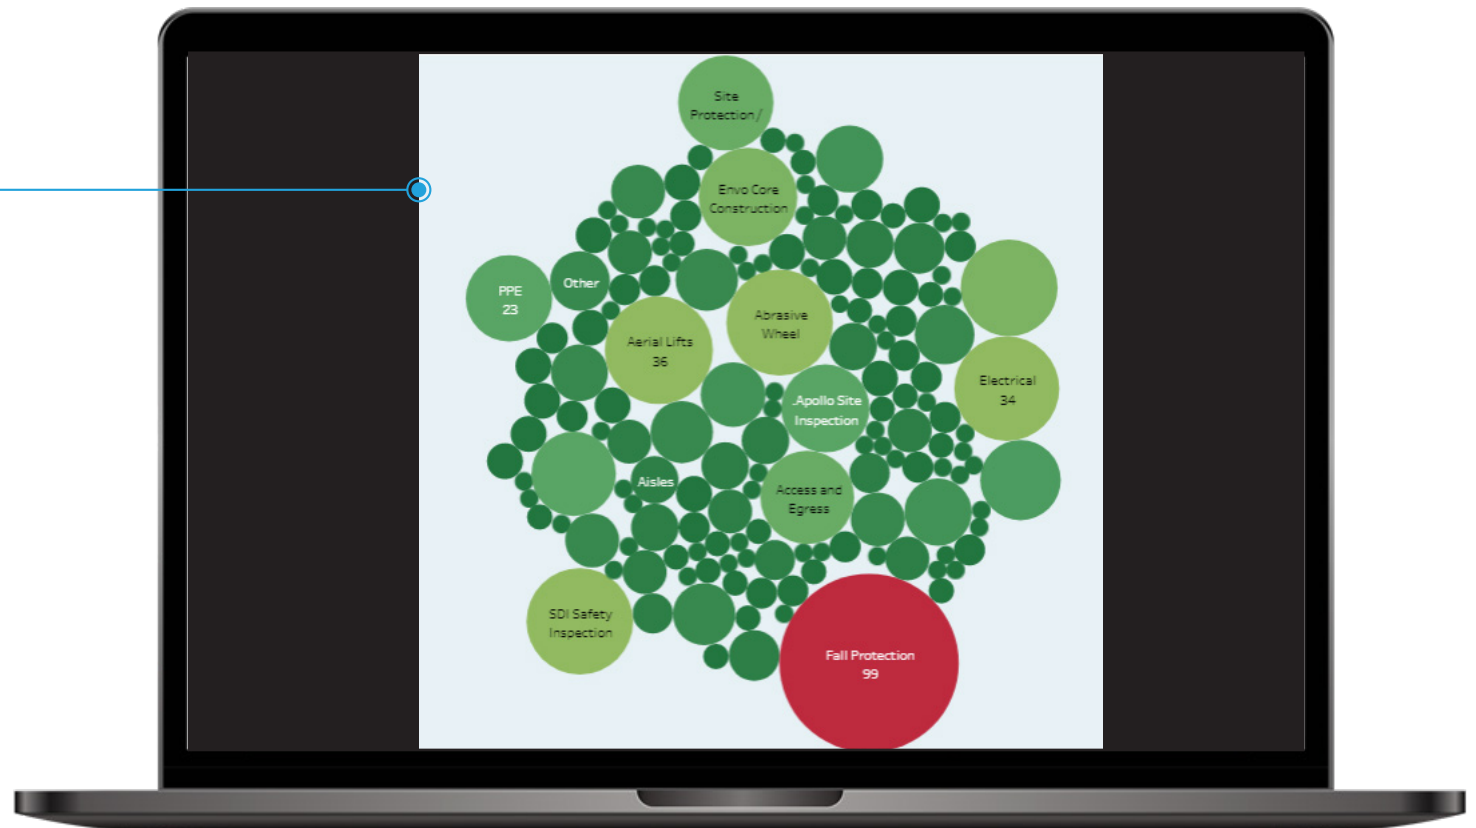

Measure Time to Close Issues

The shorter the time to close issues, the lower
the risk to the organization
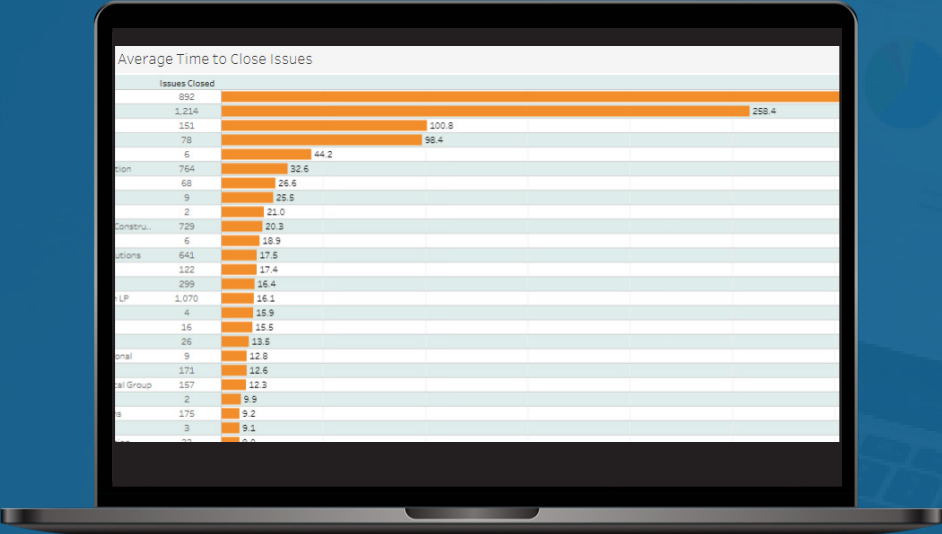

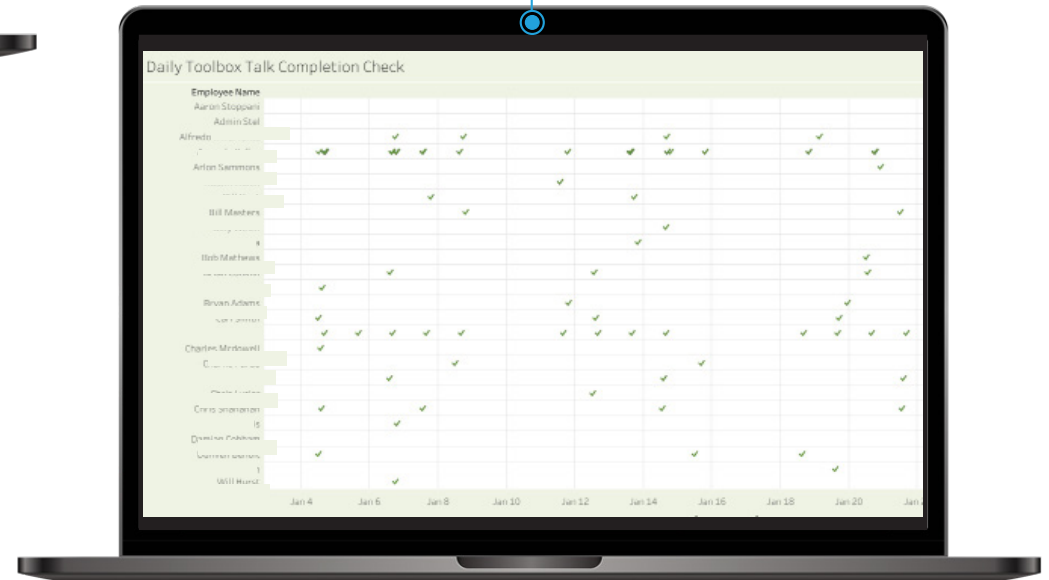

Be alerted when things are about to expire

Safety Meetings
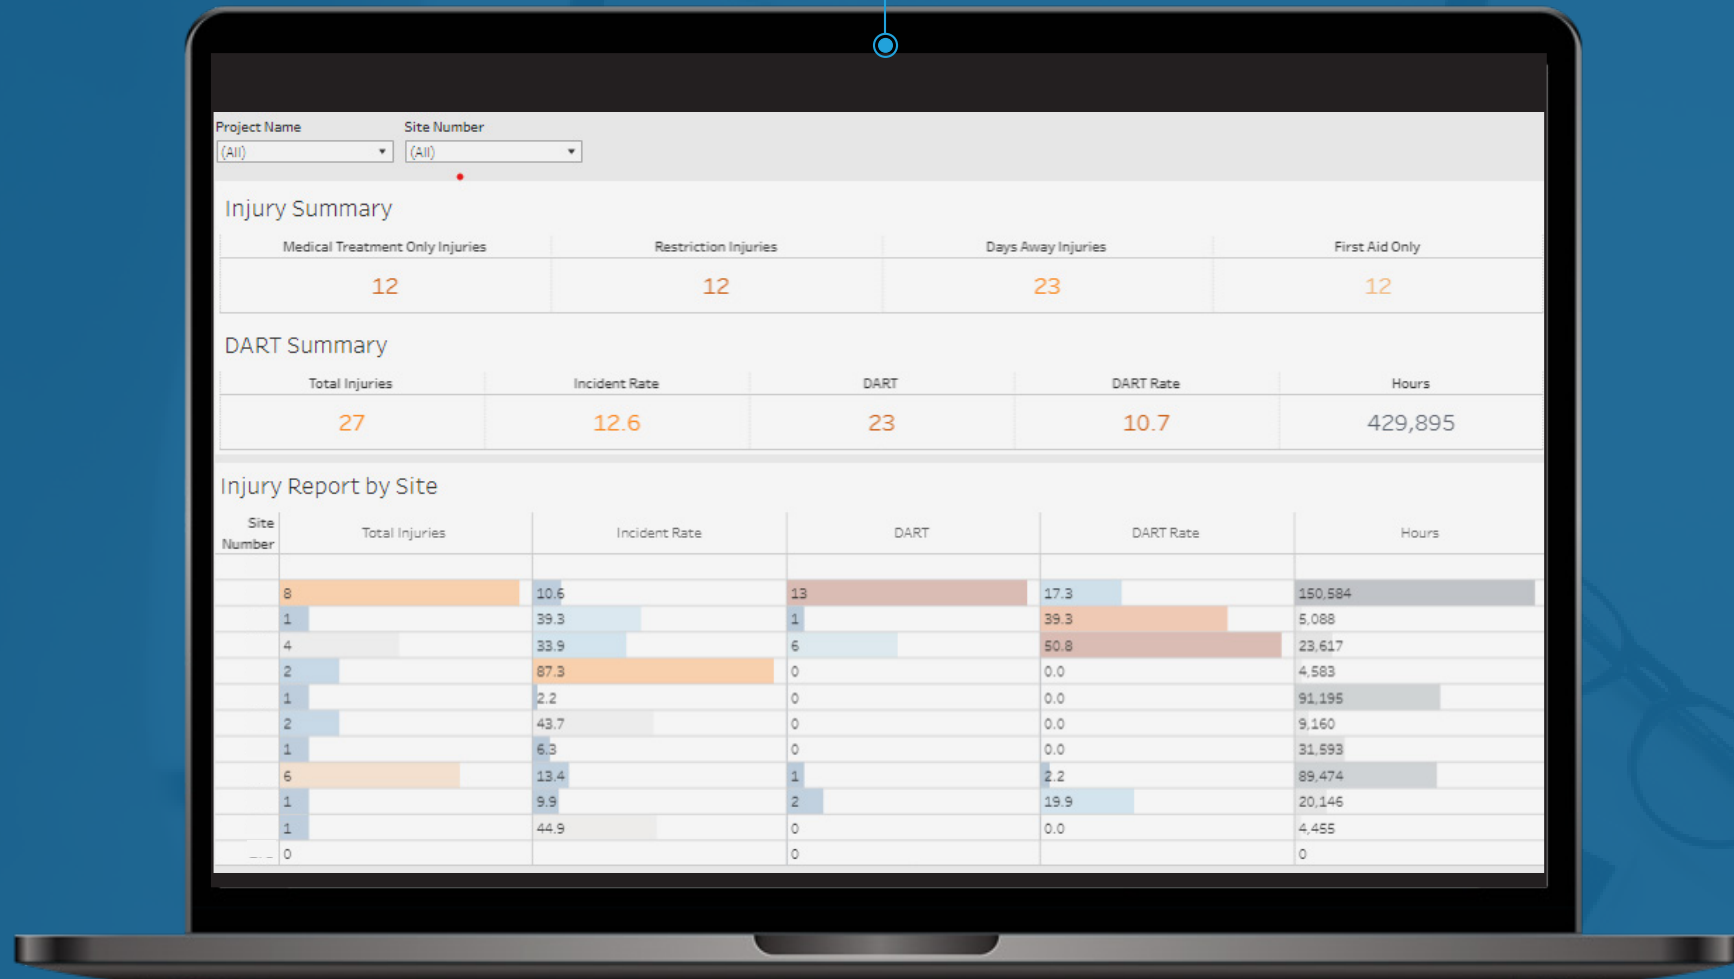

Track all participants in safety meetings at any time

Tracks all participants, even people outside your company

DART Reporting Made Easy

Government Reporting

Custom Dashboards

RTRS works with companies to develop custom dashboards for their organization usually within 7 days.

RTRS works with clients to develop dashboard requirements.

Client is billed for work.

RTRS provides hard price to develop custom dashboard (~$100-$1,000 per dashboard)

Dashboard is developed and tested with client.
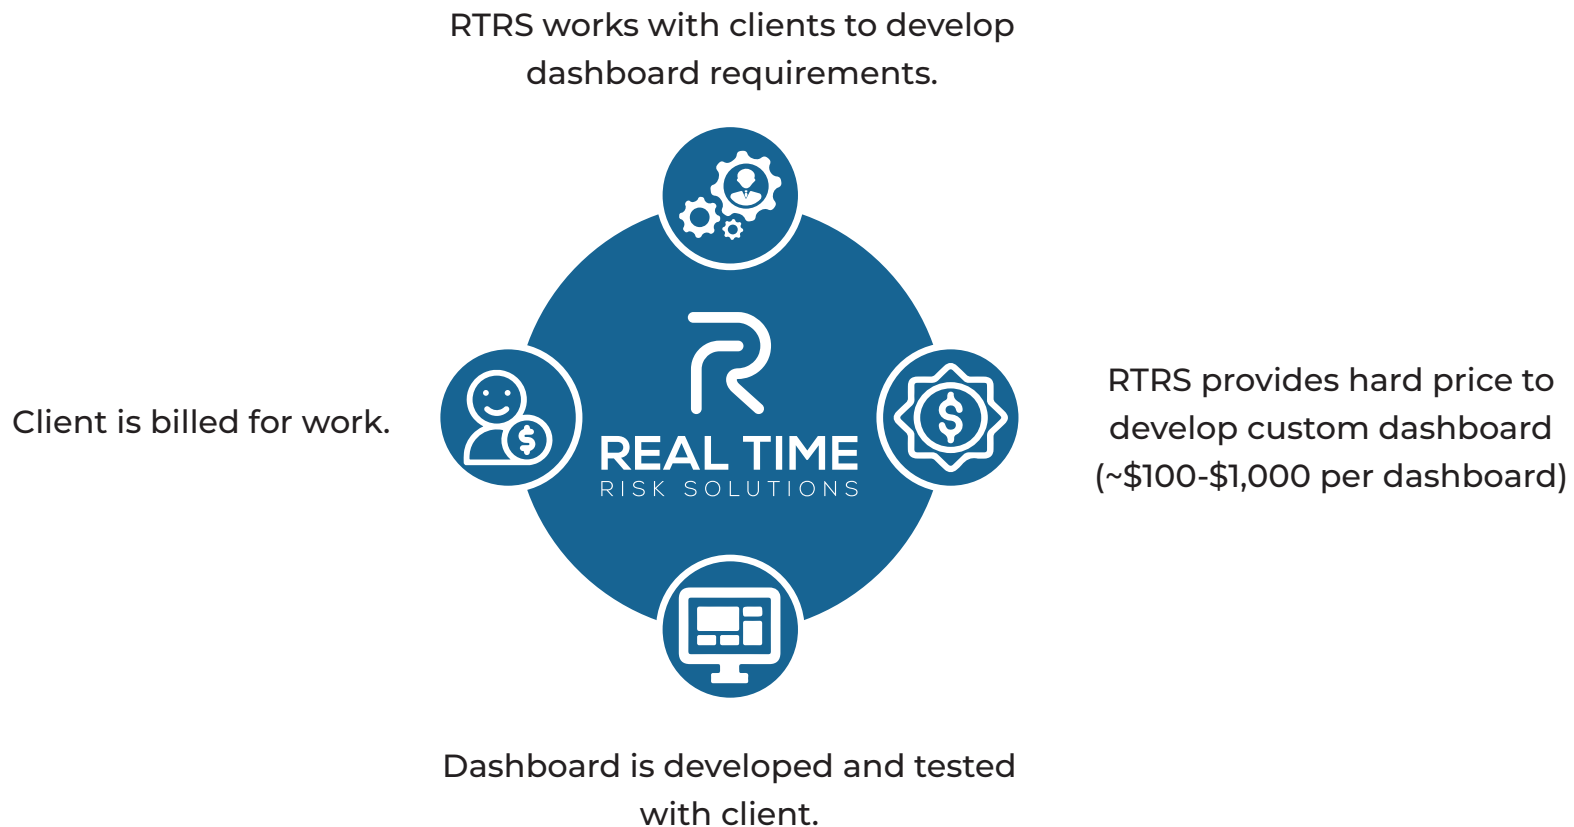

We believe that a safety management system should adapt to you — not the other way around

Unlock the power of data-driven safety with RTRS Pro
